

PROFILE SUMMARY

Digital Transformation Program Leader with 15+ years of experience delivering enterprise security modernization across global organizations including Unilever and Amazon. Expert in AI-powered surveillance, IoT security infrastructure, and cloud-based access control systems across high-risk operational environments. Proven record managing multi-million-dollar transformation programs achieving up to 30% cost reduction and significant risk mitigation. Skilled in global vendor strategy, enterprise RFP leadership, and large-scale infrastructure modernization. Enabled smart infrastructure transformation through AI-driven surveillance, IoT security systems, and cloud-managed access platforms.

Core Competencies

Program Leadership

- Digital Transformation
- Global Program Management
- Portfolio Governance
- Risk Management
- Agile Delivery

Security Technology

- AI Video Analytics
- Physical Security Infrastructure
- IoT Security Systems
- Cloud Access Control

Tools & Platforms

- Lenel
- Avigilon
- Axis
- Hikvision
- Samsung
- MS 365
- JSVG
- Autocad Viewer

KEY CAREER ACHIEVEMENTS

- Secured 30% savings in technology expenditure by driving a 1.5-year global RFP and vendor negotiation program managing multi-million procurement portfolios.
- Boosted COVID-19 compliance by 50% by deploying AI-driven video analytics on CCTV infrastructure across 3 Diageo supply chain sites.
- Strengthened security across 15 major Amazon facilities by engineering enterprise access control systems, enabling a 15% reduction in unauthorized access incidents.
- Delivered 5% under-budget program execution at Amazon while reducing breach-related revenue loss by 50% through rigorous financial and risk management controls.
- Reduced fraud incidents by 40% by developing and executing a comprehensive CCTV surveillance network across 1,500 ATM locations for National Holding.
- Enhanced physical security posture by 40% by leading ADIB's complete surveillance migration, deploying 500+ advanced cameras across the headquarters.
- Cut security-related expenses by 20% by designing cost-effective physical security solutions for corporate & government clients at Tyco.

CAREER HISTORY

Sep 2020 – Jan 2025 | Unilever, Bangalore as Global Program Manager - Digital Transformation

- Led enterprise-wide Security Architecture transformation integrating AI surveillance, IoT sensors, and cloud-based access control platforms.

- Delivered 30% cost reduction by implementing enterprise AI-powered video analytics platforms improving real-time threat detection.
- Delivered security modernization programs protecting critical infrastructure across manufacturing plants, logistics hubs, and enterprise campuses.
- Directed multi-million-dollar transformation portfolios ensuring PMO governance, portfolio prioritization, and strategic roadmap execution
- Led global vendor strategy and enterprise RFP initiatives standardizing security technology platforms across regions.
- Architected AI-driven surveillance and cloud access ecosystem integrating CCTV analytics, IoT sensors, and centralized monitoring platforms.

May 2020 – Sep 2020 | Diageo (via RGP), REMOTE as Project Consultant - Supply Chain Digital Applications

- Strengthened worker safety and operational compliance by enabling real-time monitoring of shop-floor activities through intelligent video analytics.
- Established the digital foundation for long-term supply chain transformation by demonstrating the business viability of AI-driven monitoring solutions.
- Elevated compliance adherence across supply chain sites by embedding digital monitoring mechanisms into daily operational workflows.
- Improved governance effectiveness within supply chain environments by linking technology-driven monitoring to regulatory and policy enforcement needs.

Apr 2017 – Jul 2019 | Amazon, Bangalore as Project Management Specialist - Technology Infrastructure

- Delivered large-scale security infrastructure programs across major logistics facilities while maintaining 5% under-budget execution.
- Strengthened operational security by deploying surveillance and access control technologies across high-volume logistics environments.
- Reduced breach-related revenue loss by 50% through enhanced risk monitoring, compliance frameworks, and infrastructure upgrades.
- Coordinated cross-functional teams spanning engineering, operations, compliance, and vendors to deliver complex security transformation initiatives.

Sep 2015 – Dec 2016 | National Holding, UAE as Video Surveillance Product Engineer

- Reduced security incidents across large surveillance networks by optimizing camera placement, coverage design & monitoring reliability.
- Engineered surveillance system architectures suitable for high-risk, high-traffic environments requiring continuous uptime and incident traceability.
- Standardized CCTV deployment frameworks across geographically distributed locations to ensure consistency, scalability, and operational stability.
- Optimized surveillance performance by aligning camera specifications, field-of-view design, and network integration with real-world operating conditions.
- Enabled rapid security infrastructure expansion by designing surveillance solutions scalable for large multi-location rollouts.
- Partnered with operations, security, and infrastructure teams to align surveillance engineering with live operational risk and compliance needs.

▣ PREVIOUS ROLES

- Aug 2013 – Aug 2015 | Tyco Fire & Security UAE LLC, UAE as Security Solutions Specialist
 - Led security solution presales engineering for high-profile projects in commercial and government sector.
 - Delivered CCTV and access control solutions aligned to site-specific risk, safety, and regulatory requirements.
- Aug 2012 – Jan 2013 | Sintel Satellite Services Inc, Remote as Application Engineer
 - Provided sales support for satellite solutions, contributing to a 10% increase in client acquisition
- Nov 2011 – APR 2012 | APD Communications, UAE as Presales Support Consultant-Telecom
 - Advised public safety and critical communication solutions to State Government Institutions that improved emergency response times by 25%.
- Dec 2008 – Oct 2011 | Site Technology Ltd, UAE as Presales Engineer-Security Systems
 - Engineered security solutions for defense and government clients, improving project contract wins by 30%.

▣ EDUCATION

- B. Tech. in Electrical, Electronics, and Communications Engineering, Cochin University of Science and Technology, 2006.

▣ CERTIFICATION

- PG Program in Project Management | University of Massachusetts Amherst | 2023.
- Project Management Professional (PMP) - Industry Certified
